

Hafiz M Mujeeb Arshad

GIS Analyst & Front-End Developer

- mujeebarshad053@gmail.com
- 0329-9966690, 0304-3851854
- Lahore, Pakistan

PROFILE

Completed a Bachelor's degree in Geographic Information Systems (GIS) with knowledge of spatial analysis, remote sensing, cartography, and geospatial data management. Skilled in ArcMap, parcel mapping, quality control (QC), and data visualization, with practical experience gained through internships at Spatio and Excellence Code Solutions. Also familiar with front-end development, combining geospatial and web-based skills. Passionate about delivering accurate, data-driven geospatial solutions and building a professional career as a GIS Analyst.

SKILLS

GIS Software — ArcMap

Web GIS — Basic interactive map creation

Data Handling — Excel, CSV, Shapefile

Spatial Analysis & Cartography

Map Visualization & Thematic Mapping

MS Office

PROFESSIONAL EXPERIENCE

GIS Intern, Saptio

07/2025 – 09/2025 | Lahore

- Performed parcel mapping using accurate digitization techniques to create clean and well-structured spatial data.
- Conducted Quality Control (QC) on parcel datasets to ensure spatial accuracy, consistency, and error-free mapping outputs.
- Used ArcMap for editing, managing, and visualizing parcel layers and geospatial data.
- Handled shapefiles, attribute tables, and related spatial datasets for organized GIS workflows.
- Developed practical experience in parcel mapping workflows, spatial data handling, and maintaining mapping accuracy standards.

Front End Developer, Excellence Code Solutions

09/2023 – 11/2023 | Lahore

- Developed responsive website layouts using HTML, CSS, JavaScript, and Bootstrap, building interactive UI components to improve user flow and functionality.
- Ensured mobile-friendly design through clean structure and smooth responsiveness, while collaborating on page design, layout adjustments, and browser compatibility.
- This experience strengthened my front-end coding discipline, with a focus on clarity, reusability, and user-centered design.

EDUCATION

Geographical Information System (GIS), University of the Punjab

17/12/2022 – 14/05/2026 | Lahore, Pakistan

Completed a Bachelor's degree in Geographic Information Systems (GIS) with knowledge of spatial analysis, remote sensing, cartography, and geospatial data management. Skilled in using ArcMap and GIS tools for mapping, spatial data analysis, and geo-visualization. Gained practical experience through academic projects and research work, with a strong interest in data-driven and accurate geospatial solutions. Ready to begin a professional career as a GIS Analyst.

PROJECTS

Spatiotemporal Assessment of Ecological Quality Using Remote Sensing Ecological Index (RSEI): A Five-Year Study of Lahore and Hafizabad Districts, Punjab, Pakistan (2021–2025)

03/2026 – 05/2026

- Conducted a five-year ecological quality assessment of Lahore and Hafizabad using Landsat 8 satellite imagery and the Remote Sensing Ecological Index (RSEI).
- Applied NDVI, NDBSI, Wetness, and Land Surface Temperature (LST) indicators with Principal Component Analysis (PCA) for spatial and temporal environmental analysis.
- Performed seasonal analysis, water masking, geo-visualization, and ecological classification using ArcGIS/ArcMap and remote sensing techniques.
- Analyzed urban expansion, vegetation changes, and ecological quality variations from 2021–2025.
